About Me

I started playing since I was a child: a passion that I carry with me and still drives me. I'm driven by the idea that level design has a huge impact on delivering an impactful experience. I'm ready to put into practise everything I've larned and I'm willing to improve as much as I can through study and practice.

Experience

QA software engineer

SIINFO- 2025/Present

- QA & Testing Management: Managed end-to-end quality assurance and testing activities for multiple software releases and user acceptance testing (UAT).
- Defect Tracking & Agile Workflow: Utilized Jira for efficient bug tracking, issue management, and collaboration across cross-functional teams.
- Leveraged Jenkins to monitor continuous integration processes and ensure stable build deployments.
- Backend & Database Management: Worked with Firebase for real-time data monitoring and successfully queried databases to validate data integrity.

Level Design Lecturer

Accademia Italiana Videogiochi- 2021/2022 and 2023/2025

- Worked with a total of eight classes and more than a hundred students
- Tached the basis of Game Design and in depth concepts of Level Design:
 - Pipeline: from pre-production to post-production.
 - Unreal Engine 5: basics, landscape, lighting, materials and optimization
 - Teaching mechanics, flow, pacing and how to approach different genres

Level Designer

Dino Path Trail - 2021/Present

- Survival roguelike winner of the Grand Prix White Nights Dev Contest '22 in Istanbul and the Best Debut Game at the Italian Video Game Students Awards 2026
- Analyzed the competitors and the way they built their maps.
- Analyzed different procedural systems and collaborated with programmers to design our own system.
- Designed different maps, including the one utilized for the vertical slice.
- Designed and created different encounters that will be randomly generated when launching the game, including both combat and puzzle encounters.

Education

Italian Videogames Academy - 2019/2021

Game and Level design

- A 3 years master simulating a work environment with frequent crunch periods to help us better understand the real difficulties of this job.
- Learned basic and advanced lessons about Game and Level design with tasks every week and month like:
 - Layout, Blockout and Enrichment on 3D and 2.5D projects
 - Flow & pacing and Encounter design
- Created three 1 year long projects. Deadlines were costantly shifted to make us work under pressure, develop the ability to communicate and work with other developments.

Soft skills

- Teamwork
- Communication and feedback
- High adaptability
- Listener

Tech skills

Proficient

- Unreal Engine
- Unity
- Google Drive Documentation
- Jira

Beginner

- Photoshop
- Github
- Jenkins

Languages

Native

Proficient

Free Time

- Analyzing movies
- TTRPGs
- Camping
- Martial arts
